Hi Judith,

In preparation for the upcoming Mastering ArcGIS Pro 3:Maps, Layers, Projects, and Layouts classes in Punta Gorda and Tallahassee, I wanted to send you the training materials that will be used in the class.

I've attached a document that provides access to our online training platform for the class. Inside the class are the materials that will need to be downloaded and installed for each student. Materials include an exercise book (pdf format), exercise data (zip file that will need to be extracted), and optional lecture notes. If possible it's helpful for students to have a separate device (table) where they can load the exercise book so that they don't have to constantly navigate back and forth between the book and ArcGIS Pro.

There is a hard copy of the exercise book that can be purchased separately if anyone prefers. The link is: <https://geospatialtraining.com/books/fundamental-arcgis-pro-skills-workbook-1/>

Let me know if you have any questions.
